KAVITHA S

B. TECH ARTIFICIAL INTELLIGENCE AND DATA SCIENCE

kavitha.s09bvn@gmail.com | linkedin.com/in/kavitha-s-8252b4298 | github.com/kavizzk

PROFILE SUMMARY

B.Tech graduate in Artificial Intelligence and Data Science with training in Java, Spring Boot, REST APIs, SQL, Angular, and microservices. Strong foundation in object-oriented programming, problem-solving, and database management. Interested in developing secure, scalable applications and contributing to software engineering projects.

EDUCATION

B. Tech - AI & DS : Nandha Engineering College, Erode (2022-2026) - CGPA: 8.80/10
SSLC : Sri Vidya Mandhir Matriculation School (2019-2020) - Secured 99.2%
HSC : Adharsh Vidhyalaya Matric Higher Secondary School (2021-2022) - Secured 90.66%

TECHNICAL SUMMARY

Languages: Java, Python (Basics)
Backend: Spring Boot, Spring MVC, Spring Data JPA, Hibernate, REST APIs
Frontend: Angular, TypeScript, HTML, CSS, JavaScript
Tools: Git, GitHub, Maven, Docker, Postman
Database: MySQL , MongoDB
Core Concepts: OOP, Collections, Exception Handling, Generics, Java 8, DBMS
Soft Skills: Problem-Solving, Teamwork, Adaptability

PROJECTS

STAYVISTA – HOTEL MANAGEMENT SYSTEM

Developed a full-stack Hotel Management System using Java 21, Spring Boot, Microservices, Angular, and MySQL to manage guests, rooms, reservations, billing, and hotel operations. Implemented JWT-based authentication and role-based access control, integrating Eureka service discovery, centralized configuration, Spring Cloud Gateway, and REST APIs for microservice communication.

Technologies Used: Java 21, Spring Boot, Microservices, Angular, MySQL, Docker

SECURE DISTRIBUTED KEY MANAGEMENT USING THRESHOLD CRYPTOGRAPHY AND AI-BASED TRUST EVALUATION

Designed a distributed key management system to reduce single points of failure in centralized key storage. Applied threshold secret sharing to distribute encryption-key shares across independent nodes and AI-based trust evaluation to identify unreliable nodes. Built a Streamlit interface to visualize node status and simulate key management and encryption/decryption operations.

Technologies Used: Python, Streamlit, AES, Threshold Secret Sharing

PHOTOGRAPHER BOOKING SYSTEM

Developed a web-based platform that connects customers with professional photographers for various events, enabling easy photographer discovery and online bookings. Implemented role-based authentication, photographer profiles, availability management, booking, reviews, and admin dashboard.

Technologies Used:React.js, Node.js, Express.js, MongoDB

VOICE ASSISTANT USING AI

Developed an AI-powered voice assistant that accepts voice commands and converts speech into text to understand user queries. Implemented an interactive interface to process user inputs and provide responses through voice-based interaction.

Technologies Used: HTML, CSS, JavaScript, Web Speech API (Speech-to-Text & Text-to-Speech).

DIABETIC FOOT ULCER DETECTION USING IOT

Developed an IoT-based monitoring system to detect potential diabetic foot ulcer risks by measuring foot temperature and pressure using sensors. Integrated the Blynk IoT mobile application to monitor real-time sensor readings and implemented a threshold-based alert system to notify users when readings exceed predefined limits.

Technologies Used: IoT, Temperature Sensor, Pressure Sensor, Blynk IoT, Microcontroller.

PROFESSIONAL EXPERIENCE

CubeAI Solutions Tech Private Limited, Tiruchengode.

Web Development Intern | (Duration: 14 days) | Offline

- Learned and implemented HTML, CSS, and JavaScript for web development.
- Gained hands-on experience in building responsive web pages.
- Developed interactive user interfaces and improved front-end design skills.

Capgemini

Analyst Training Program | Duration: 4 Months | (Training experience)

- Gained practical knowledge of Core Java, OOP concepts, Collections, Exception Handling, and Java 8 features.
- Learned Spring Boot, REST APIs, Microservices, Spring Security, and JWT authentication.
- Worked with SQL, Hibernate, JPA, Angular, Docker, RabbitMQ, and Git.
- Strengthened problem-solving, coding, and full-stack application development skills.

CERTIFICATIONS AND PARTICIPATION

- Cloud Computing – NPTEL Elite (71%)
- Presented a paper on "Al in Robotics" at Hindusthan Institute of Technology.
- Python Basics – Digilabs
- Power BI for Beginners, Introduction to MS Excel – Simplilearn
- Workshop on “GenAI in Action” at Kongu Engineering College.
- Presented a paper on "Blue Brain Technology" at Vellalar Institute of Engineering and Technology.
- Secured 2nd Place in Code Feast, Nandha Engineering College.
- Presented projects at Innovation Day 2023 and Innovation Day 2024.
